Leon Kwan

Frontend engineering

github.com/notsaltylol | linkedin.com/in/kwanleon

I build full-stack web products with React, TypeScript, and Next.js, with experience in self-service analytics, user settings, and responsive interfaces.

Experience

Khorium | CTO | February 2026 - Present

- Cut CAD-to-simulation setup from days to minutes, leading 5 engineers building the end-to-end platform.
- Reduced manual workflow steps by 80% with an LLM assistant that drives app logic and UI tools from natural language.

Amazon | Software Development Engineer 2 | September 2023 - February 2026

- Delivered custom user settings feature for HR report tooling with React/TypeScript, achieving 70% adoption rate.
- Developed full-stack self-service business intelligence tool using React, Java, DynamoDB, driving 100% increase in customers.

NEC X | Full Stack Engineer | February 2023 - August 2023

- Led full stack development, using React/TypeScript/Next.js/Tailwind CSS to create responsive, SEO optimized websites.

University of Florida | Teaching and Research Assistant | August 2021 - December 2022

- Developed an autograder for coding assignments from 300+ students, giving feedback on code quality, time complexity, etc.

Education

University of Florida | B.S. in Computer Science | December 2022 | GPA: 3.74

Skills

TypeScript, JavaScript, React, Next.js, Tailwind CSS, Node.js, Java, DynamoDB, Git

Projects & Research

Ninhando | React, TensorFlow.js

2022 Georgia Tech Hackathon - Best Retro Hack

- Built a React app that plays an NES emulator with hand gestures via a TensorFlow.js vision model.

Sheltr | React.js, Google Maps API

2021 UC Davis Hackathon - Overall Winner: Best Hack for Social Good

- Built a React app mapping government housing data to simplify the housing search for lower-income families.
